+355 68 43 47 067 | arditxhuveli@gmail.com | github.com/arditxhuveli1 | Tirana, Albania (open to remote)

## PROFESSIONAL SUMMARY

Full-stack developer who ships end to end: Node.js/NestJS and Laravel APIs, React/Next.js frontends, and the CI/CD and servers they run on. Nearly 2 years across FinTech, public-sector education, and an ML-powered research platform.

## FOCUS AREAS

- Backend APIs & Microservices
- Frontend with React & Next.js
- Payment & FinTech Flows
- DevOps, CI/CD & Deployment

## PROFESSIONAL EXPERIENCE

### SMIP - Education Management Platform

Full-Stack Developer | September 2026 - Present

- Working on Albania's national pre-university education system, digitizing grades, attendance, and student records for schools, teachers, and parents.

### BiblaPro - Bible-Study Platform (Freelance)

Full-Stack Developer | January 2026 - August 2026

**Technologies:** PHP, MySQL, Vanilla JS

- Built Shpata e Fjalës, a social study layer with an activity timeline, threaded commentary, and a custom reaction system.
- Shipped study groups end to end: CRUD REST API, invite and membership flows, group-scoped comments.
- Added user profiles with public/private commentary, extending the core framework's user model and account-settings layer.

### POK - FinTech

Full-Stack Developer | December 2024 - April 2026

**Technologies:** Node.js, React, PostgreSQL

- Focused on the back office: built admin-panel features that made day-to-day work easier for support and admin staff.
- Split the notification system to serve both customers and merchants, so merchants receive their own notifications.
- Implemented digital card renewal.
- Refactored codebases and microservices for better performance and scalability.

### Match4Research - Research-Collaboration & Funding Platform (Part-time)

Full-Stack Developer | August 2025 - December 2025

**Technologies:** NestJS, Next.js, Docker

- Built the backend architecture: REST APIs and core business logic.
- Integrated a machine-learning model that recommends the best-fit open calls for each user based on their line of work.
- Ran DevOps: CI/CD with GitHub Actions, plus server setup, deployment, and maintenance.
